

SAQIB JABBAR

Growth & Operations Manager | SaaS Analytics, Automation, and Customer Success

Islamabad, Pakistan | +92 (346) 817-3203 | 132saqib@gmail.com

PROFESSIONAL SUMMARY

Growth and operations professional with 5+ years building the data, automation, sales, and customer-success backbone for SaaS startups. At JaldiTech, a UAE-based CRM startup, I built the company's analytics stack from scratch, launched a referral program that drove 8% average MoM growth across its first year, launched the Pakistan sales market with 25% average MoM growth in the first 3 months, built an AI-powered outbound prospecting system using n8n, Apify, OpenAI, and MessageBird, and hired and led both sales and support teams. ***Across all of this I acted as a strategic partner to the CEO, building the analytics and reporting that informed company-wide direction and supported JaldiTech's path to profitability and growth in 2025 (grew overall MRR by 48%).*** Equally comfortable writing SQL, configuring n8n and Zapier workflows, building Retool dashboards, running ad campaigns, or coaching a sales team.

EXPERIENCE

Growth & Operations Manager April 2025 – Present

JaldiTech – UAE-based CRM startup (Remote)

- Launched the Pakistan sales market end-to-end: hired and managed a 3+ person sales team, documented the full sales process, and **drove 25% average MoM growth in Pakistan over the first 3 months.**
- **Built an automated outbound prospecting system with n8n, Apify, and BigQuery** that scraped organizations actively running Meta ads and enriched them into a sales-ready lead pipeline.
- Generated personalized outreach with the OpenAI API and dispatched automated WhatsApp campaigns through MessageBird, **plus ran an outbound email campaign that closed at 0.78%.**
- Launched a referral program using GrowSurf, MessageBird, and Sender.net that **delivered 8% average MoM growth across its first year through the referral channel**
- Created monthly sales performance reports for the CEO, tracking agent-level KPIs, conversion rates, and pipeline health **that informed company wide direction and decisions**
- Integrated Freshdesk (WhatsApp, Chat, Email) into a single omnichannel view, **saving the customer success and support team 10+ hours per week previously lost to channel switching.**
- Hired and managed a team of support engineers and rolled out KPIs and QA processes for support quality.
- Built and managed onboarding tours with Viral Loops, removing repetitive onboarding work from the support team.

Growth & Technical Support Lead June 2023 – April 2025

JaldiTech – UAE-based CRM startup (Remote)

- Built a data warehouse in BigQuery, transforming historical data with Python and syncing Stripe, CRM, Facebook, and Google data via Fivetran into a single source of truth.
- **Developed interactive dashboards in Retool, Google Sheets, and Grafana (SQL) tracking MRR, ARR, churn, CLTV, and cohort performance for stakeholders and investors.**
- Led A/B testing for marketing campaigns, optimizing creative and messaging changes that tripled the MQL conversion rate.
- Analyzed Mixpanel product-usage data to identify friction points, partnering with engineering to improve user experience and engagement.

- Automated data pipelines from Stripe and Mixpanel into Google Sheets using AppScript (JavaScript and Python), eliminating hours of manual investor and ops reporting each week.
- **Built client integrations with webhooks, Zapier, and JavaScript**, simplifying lead transfers from Facebook, webforms, and other sources into Jaldi's CRM.
- Designed and managed Meta and Google Ads campaigns, **driving a 10x increase in social followers through combined organic and paid strategies.**

Technical Support Engineer January 2023 – June 2023

JaldiTech – UAE-based CRM startup (Remote)

- **Helped customers integrate Facebook, webforms, and other lead sources into Jaldi using webhooks (JavaScript) and Zapier, designing complex multi-step automations and using AnyDesk for hands-on support.**
- Designed and tested Mailgun email templates, validating deliverability and rendering via Postman.
- Ran product testing, logged results on GitHub, and **used Postman to push test data into Jaldi's CRM.**
- Supported the sales team on calls and product demos when needed.

Technical Support Engineer July 2021 – January 2023

KeepTruckin (now Motive) – Fleet Management SaaS

- Handled inbound customer support for software and hardware issues, **recording cases in Salesforce and conducting follow-ups by call and email.**
- Analyzed customer usage data from internal databases and Grafana, raising Jira tickets and partnering with engineering to resolve issues.
- Supported larger enterprise customer cases and helped produce client-facing reports.
- **Closed 2,000+ cases with approximately 97% CSAT.**
